## EXPERIENCE

### CodeSpyder Technologies Pvt. Ltd.

Student – Data Science Program

Dec 2025 – Present

Pune, Maharashtra

- Applied **Machine Learning**, **Deep Learning**, and **Data Analysis** techniques on real-world datasets to solve practical problems.
- Built data preprocessing and visualization pipelines using **Python**, **NumPy**, **Pandas**, and **Matplotlib**.
- Developed and evaluated classification and regression models using **Scikit-learn**, **TensorFlow**, and **Keras**.
- Performed feature engineering, model optimization, and model evaluation following industry-standard ML workflows.

## PROJECTS

### AI Object Detection System | Python, FastAPI, React.js, YOLOv11, OpenCV

- Developed a full-stack AI-powered object detection application using **FastAPI**, **React.js**, **YOLOv11**, and **OpenCV**.
- Built RESTful APIs to perform real-time object detection on images, videos, and webcam streams.
- Designed a scalable backend architecture with modular services to improve maintainability and AI inference performance.

### UrbanWear – Full Stack AI E-commerce Platform | Python, FastAPI, React.js, MySQL, Docker

- Built a full-stack AI-powered e-commerce platform featuring authentication, product management, shopping cart, and order processing.
- Developed scalable RESTful APIs using **FastAPI** and integrated **MySQL** for efficient data management.
- Designed responsive React.js interfaces and containerized the application using **Docker** while following a modular backend architecture.

## EDUCATION

### Smt. Kashibai Navale College of Engineering (SKNCOE)

Bachelor of Engineering (B.E.) in Information Technology

Pune, Maharashtra

Expected Graduation: 2028

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, JavaScript, HTML5, CSS3

**Frameworks:** FastAPI

**Machine Learning:** Machine Learning, Deep Learning, Computer Vision, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation

**Libraries:** TensorFlow, Keras, Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib

**Databases:** MySQL

**Developer Tools:** Git, GitHub, Docker, Postman, Swagger UI, VS Code
