PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on experience in Python, FastAPI, React.js, Machine Learning, Deep Learning, and Computer Vision. Experienced in developing full-stack web applications and AI-powered software solutions. Skilled in backend development, REST API design, data preprocessing, model development, and scalable application architecture. Passionate about building intelligent software and continuously learning modern technologies.

EXPERIENCE

CodeSpyder Technologies Pvt. Ltd.

Dec 2025 – Present

Student – Data Science Program

Pune, Maharashtra

- Developed practical knowledge of **Machine Learning**, **Deep Learning**, and **Data Analysis** through hands-on projects using real-world datasets.
- Built data preprocessing and visualization pipelines using **Python**, **NumPy**, **Pandas**, and **Matplotlib**.
- Implemented machine learning models for classification and regression using **Scikit-learn** and evaluated model performance with standard metrics.
- Developed and trained deep learning models using **TensorFlow** and **Keras** for predictive and computer vision tasks.
- Performed feature engineering, model optimization, and data analysis while following industry-standard machine learning workflows.

PROJECTS

AI Object Detection System | *Python, FastAPI, React.js, YOLOv11, OpenCV*

- Developed a full-stack AI-powered object detection application using FastAPI as the backend and React.js as the frontend.
- Integrated the YOLOv11 model with OpenCV to perform real-time object detection on images, videos, and webcam streams.
- Designed RESTful APIs for media upload, object detection, and result retrieval, enabling efficient frontend-backend communication.
- Implemented a modular backend architecture to improve maintainability, scalability, and AI inference performance.

UrbanWear Full Stack AI E-commerce Platform | *Python, FastAPI, React.js, MySQL, Docker*

- Developed a full-stack e-commerce platform featuring secure user authentication, product management, shopping cart, and order processing.
- Built RESTful APIs using FastAPI and integrated MySQL for efficient management of users, products, orders, and inventory.
- Designed responsive user interfaces using React.js to provide a seamless shopping experience across desktop and mobile devices.
- Containerized the application using Docker and followed a modular backend architecture with Git and GitHub for version control.

EDUCATION

Smt. Kashibai Navale College of Engineering (SKNCOE)

Bachelor of Engineering (B.E.) in Information Technology

Pune, Maharashtra

Expected Graduation: 2028

- Affiliated with Savitribai Phule Pune University (SPPU).
- Relevant Coursework: Data Structures, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Deep Learning.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: FastAPI, React.js, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, OpenCV, Matplotlib

Machine Learning: Machine Learning, Deep Learning, Computer Vision, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation

Databases: MySQL, PostgreSQL

Developer Tools: Git, GitHub, Docker, Postman, Swagger UI, VS Code

Core Concepts: Object-Oriented Programming, REST APIs, Database Management Systems, Operating Systems, Computer Networks
